RESUMEN DE “THE METAL AGES”

➤ The Metal Ages was the last period of Prehistory.

About 7,000 years ago, people learned to make objects out of metal.

➤ People made their first metal objects out of copper. Later, they used bronze, then iron.

With these metals, people made:

- weapons, such as, swords and axes.
- ornaments, such as, brooches and bracelets.
- and tools, such as, hoes and sickles

➤ The first towns

These towns were surrounded by walls for protection.

New jobs were created. For example, some people became soldiers to defend the town. Others became traders to buy and sell metal objects, clothes and pottery.

➤ Trade

Trade increased because of important inventions.

- The wheel.
- The sail.
- The plough.
